Hi Janis,

If you have specific CEQA comments or questions on the process etc then it would be helpful to send those to me in advance. I need to forward those to the appropriate staff as John Meerscheidt is no longer with DTSC and retired.

I plan to present the actual changes to the RAP that the regulatory stakeholders supported based on the public comments. If there are specific responses identified in the Responsiveness Summary that you are unclear on, or still have concerns with then please present those to me ASAP, so I can respond appropriately.

Additionally, any toxicological or radiological concerns need to be directed to those staff that are experts in those areas as those topics are outside my areas of expertise. I can request that the respective support staff attend the CAG meeting but it may not be possible due to their personal commitments. Again, written/mailed concerns or comments

in advance of the meeting would allow me to forward to the appropriate staff for feedback on a quick turnaround.

I look forward to hearing from you on these above items so we can have a productive exchange and support the CAGs topics/interests. Thank you.

-Pete

Hi Pete,
I'm checking in with you today regarding the Nov 28 agenda. We would like you to present to the CAG on the Area 40 RAP finalization, the DTSC

response to comments, and answer any additional questions the CAG has regarding the Area 40 RAP/CEQA process.

Please let me know that what I have outlined above is consistent with your expectations for the Nov 28 meeting.

BTW, Tammy's message below was the announcement to the entire CAG that we are meeting on Nov 28. She will be sending out a second notice prior

to the meeting. And we did finalize the problem with the minutes, as you know, dating back to the July meeting but a part of the Sept minutes.

Thanks so much Pete,
Janis

Hello,

I was not in attendance at this meeting therefore I do not have any additional input other than the item that was already addressed re: Remedy Enhancement using an In-Situ technology. Regards.
